URIEL

Product presentation

The URIEL drone is a lightweight tactical drone designed to meet the operational requirements of the French army. Compact and robust, it offers a high-performance solution in the field.

Designed and manufactured in Normandy, it can be flown with or without GPS guidance, depending on the operator's capabilities, thus ensuring precise navigation.

Its modular architecture and replaceable components ensure optimized maintenance.

URIEL illustrates Drone Français' commitment to technological autonomy and operational superiority in the service of national sovereignty.

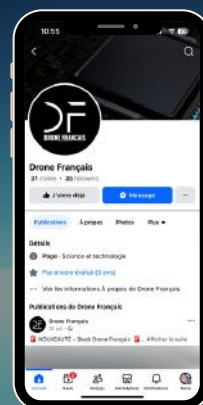

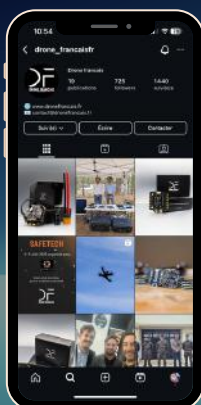

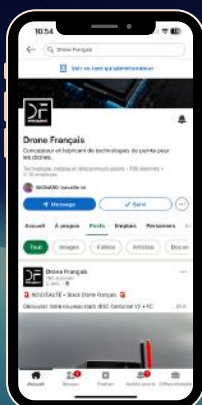

Technical specifications

Video transmission	French electronic development 5.8 GHz - 25 to 500 mW
ESC / FC	French electronic development
Chassis	The upper and lower parts are symmetrical – 3D printing possible
Autonomy without payload	20 min
Range	5 km
Control receiver	UART (FRSKY, TBS, GHOST, ELRS...)
Motors	2307 - 1300 / 1900 kV
Empty weight	570g
Dimensions	400x360x80mm

+33 9 70 93 78 37
